

# ***Vinylester and Polyester Flooring Systems***

**IPS 800PE & 900VE  
flooring systems for:**

- Tank House Basements
- Ore Processing Plants
- High Tech Plants
- Food Processing Areas
- Paper and Pulp Mills
- Chemical Plants
- General Industry

**Phoenix office • 602-296-4413**

**Tucson office • 520-577-2561**

# ***Corrosive Spills Floor Protection***

TMI flooring systems are designed for each individual project by experienced personnel. IPS 800PE and 900VE are modified polyester/vinylester systems applied in multiple, aggregate-filled layers. Our vinyl ester/polyester coating systems provides durable protection in corrosive areas such as tank house basements, chemical plants, ore processing plants or any area that is subject to a corrosive atmosphere. It is a non porous coating which will prevent solution attacking concrete, wood or metal substrate.

## ***IPS 800PE and 900VE Flooring System***

This high performing flooring system works well in high traffic areas with equipment such as forklifts and other vehicles. It can be installed with a non-slip finish for safety first! A custom-applied topcoat for desired degrees of nonskid with a variety of colors make IPS 800PE and 900VE extremely attractive and versatile.

In addition to the vinylester and polyester flooring system, TMI also has experience with flooring and tank coatings such as:

- Trowel-able coatings
- Spray Applications
- Epoxy coatings

### **Products from:**

- PermaDri (Liquid Rubber)
- Other specialty coatings including:
  - Envirotrol
  - Carbonline™

# The Six Layered Floor System

Installation over concrete, wood or metal is simple with pre-measured, pre-packaged kits and step-by-step instructions. Complete installation is possible by your personnel with a TMI Field Supervisor OR by a skilled TMI Installation Team.

# Other Service Offered by

## ***FRP Structural Strengthening Products***

Use of FRP product to repair and strengthen structures such as:

- Masonry and concrete walls
- Steel and wood beams
- Reinforced concrete beams and slabs
- Columns
- Pipes and tunnels

## ***PermaDri-Corrosion Protection and Coating***

- Tank linings
- Secondary containments
- Pond liners
- Haul truck bed liners
- Floorings
- Cooling towers
- Flotation cells
- Pipe liners

## ***Commercial Contracting***

- Piping
- Concrete construction
- General building construction
- Siding

## ***Polymer Concrete***

- Electrolytic cell and tank fabrication
- Electrolytic cell and tank repairs
- Second hand polymer concrete cell and tank modifications
- Equipment base and sump repair
- Polymer concrete primary containment units for concrete cells
